

10 Simple Ways You Can Help Save Our Planet (1 Min. Video)

Source: [Techfest IIT Bombay](#)

The earth was born over four and a half billion years ago. She sustains us and is our home. Why do we harm her? Pollute her? Cut down all her trees? Kill the animals that inhabit this beautiful planet?

Instead, let's create habits that honor earth and give her more life.

- 1) Plant more trees.
- 2) Conserve water.
- 3) Stop hunting.
- 4) Use renewable energy.
- 5) Save electricity.
- 6) Avoid Plastic.
- 7) Reduce.
- 8) Re-use.
- 9) Recycle.
- 10) Save fuel (ride a bike or take public transport).

If we ALL do these things, we can collectively make a BIG difference. In honor of Earth Day 2015, make a commitment to create at least three new eco-friendly habits.
