

Vedic Astrology for June: Cultivate Compassion, Beware of Aggression, Communicate Mindfully

Vedic Astrology for June 2015: At the beginning of June we find Venus in Cancer (since May 30, 2015) joining the planet Jupiter, exalted in Cancer. Venus stays in Cancer until July 5. With Venus in the water sign of Cancer we want security, safety, and nurturing from loved ones. This is also a time we feel more openings to give extra support and care to family members. Now with Venus traveling with benefic Jupiter we feel even more generous, kind and giving to others and our world. This is a great time to cultivate compassion and see the goodness in all things. Love can bring optimistic feelings, and romance may blossom. We also enjoy social contacts and events. Venus will conjunct Jupiter exactly at 27 degrees Cancer on June 30 and July 1.
