

THIS Is They KEY To Everything For YOU – What It's ALL About | Max Igan 2021

Source: [Inspired](#)

I think commerce gets in the way of everything. Really, when you look at it, our addiction to commerce is what's caused all this. They get people in a situation where they're completely dependent upon the commercial system, where they have to pay to be alive. And just the threat of removing that income from them is enough to keep them under control. It's enough to get them to do what you want them to do.

That's why they want people to get trades as well. They get a trade as a plumber or a builder or this, or that, or a mechanic. So you only learn how to do one thing, not everything. And you can't go and become self-sufficient because you're only good at one thing. You need to get another tradesman who's got another trade to come in and do something else, you know. And again, you're all dependent upon this commercial system. So all they have to do is take your finances away from you. And that's it, they've got you. Take away your ability to be able to earn a living, because people think they have to earn a living – they can't just live. They've got to actually pay to be alive.

What freaked me out when I was four is when I realized that people had to pay to be alive. They had to actually pay to put a roof over their heads. They couldn't just live, and they would be so readily discarded by society if they didn't have money. You can see what money is really for folks. They say money is the root of all evil. And people say, oh no, they

mean, the love of money is the root of all evil. NO, it's money itself.

You don't need this shit folks. It gets in the way of everything. It prevents you from being all that you can be because you're dependent upon this economic system all the time. That's why they created it. That's why they get you to do these things. That's why they put the whole system in place folks, just to be able to control you – just the way they're doing now.

You know, when I look at the last hundred years of society, even the loss of all of our life skills and medicinal skills with what they called witches, who weren't witches. They were simply healers and midwives. But they got to kill all of them, get rid of all those medicinal skills, and bring us into this allopathic medicine system, which is basically just killing us. And now they can lock you out of that as well. So, people don't have any skills. They don't know how to look after themselves anymore.

People can't just walk into the wild because people think that land ownership is real. You can't just go and live in the forest. I mean, somebody owns it or its government land or something. You can't just go and live there. Oh no, that's terribly radical. You got to have permission to do everything. They don't want people focused on freedom folks.

If people just believe in themselves and know themselves, none of this could happen. That's the answer to the whole thing for you. That's why you don't need violence. All you need is for people to remember who and what they are. This is what I've tried to say, right since the beginning of my shows – ever since I started doing these reports. Back when I did my first shows back in 2008, it was all spiritual stuff. Just trying to empower people into remembering themselves. You know, that's what all this is about. That's how they're able to do this because people don't believe in themselves, you know. That's

what all this is about.

That's how they're able to do this because people don't believe in themselves. They believe in other people all the time. You know, if people would just believe in themselves, all I've ever tried to do with these shows is encourage empowerment with people. And why I've always said you can't put me on a pedestal. Because I'm just the same as you. And that's the point. That's the point of the whole thing. I'm just prepared to speak.

Most people don't believe in their ability to speak. They don't believe in their ability to be able to express their own opinions because they just don't believe in themselves. They don't trust themselves that they'll get it right, you know. Just say it folks, just say what you feel. Love the people around you. Help the people around you.

You know that's what all of this has been about – all the radio shows that I've done, all the films that I've made. The very first film that I made, *The Big Picture*, back in 2008 – just to point out what the issue is, and to point out how simple the solution would be. Because this whole thing that they're doing now, as I said before, they want your soul. They've already got so many people's souls, so many people who believe the matrix is real, believe authority is real, believe this government system is real, believe all this crap – because they don't believe in themselves.

And if people could suddenly have that epiphany, and go "Wow, I've got value. I've actually got value. I'm the same as everybody else." We all have equal value. We might not have equal attributes. We might not have skills. We might not have equal talents. You might have been born in different circumstances, whatever. But we all have value. We all have the ability to have an idea that will change the world. Because even when you look at this whole system, it's just an idea.

That's the thing, people know, so many people out there know what's going on, but they just don't say anything because they don't believe in themselves. And if they did, the whole thing would go away. If people believed in themselves, we wouldn't be in this position to begin with. You don't need to believe in others. You don't need to believe that anybody in the truth movement has got the answer for you, is going to lead you to safety – because it's up to YOU. It's up to each individual to do this for themselves.

Like I said it before, I mean, I won't be here all the time. I'm 64. I'm not going to live forever. I'm sure that they're onto me. There are so many trolls out there now, and I'm sure they'd really like me to be quiet. I'm sure they'd really like to shut me up in any way they can. And what happens when they do that? You know, if you're dependent on me or you're dependent on other people to help you believe in yourself, you'll just fall because you haven't got that guidance. It's really within you now if you would just look and see, and just BELIEVE IN YOURSELF. That's what all this is about.
