

Under Anthony Fauci, Foster Children are Being Used as Human Guinea Pigs in Heinous Medical Experiments

For many years, the American foster care system in partnership with Child Protective Services (CPS) has been kidnapping children and, in many cases, handing them off to government swamp agencies that use these little ones as human guinea pigs to test experimental drugs and vaccines without consent. And all this time Anthony Fauci has been overseeing these heinous human rights abuses, allowing and even facilitating them to occur under his seemingly endless reign. An in-depth report put together by Brian Shilhavy from Medical Kidnap outlines the disgusting history of foster child experimentation in our country that has been taking place for at least the past four decades, revealing how Fauci and other prominent names, many of whom are still in their positions even under President Donald Trump, continue to abuse foster children left and right in the name of promoting "public health."
