

# Chemtrails are Causing Climate Disintegration Amid Programmed Social Apathy

By Dane Wiggington | [Geoengineering Watch](#)

[The forests are dying](#), [the oceans are dying](#), the Earth is dying, and even at this late hour the [vast majority of first world societies remain completely immersed in total denial and apathy that is manifested in many forms](#). The ever growing list of [extreme weather events and unfolding global die-offs](#) are not discussed or disclosed by the power structure owned and controlled corporate media machine of mass distraction. [Though climate engineering is aggressively denied by the criminal media cabals](#), it is [real, ongoing, and lethal to all life](#).

*The media's the most powerful entity on earth. They have the power to make the innocent guilty and to make the guilty innocent, and that's power. Because they control the minds of the masses. Malcolm X*

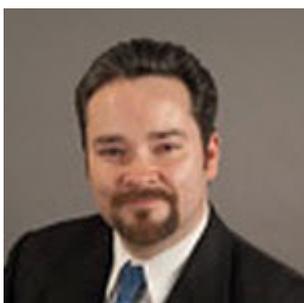

[Industrialized/militarized civilization is in its death throes](#), the [pounding of the planet by the covert climate engineering assault](#) is a testimony to the [near total loss of sanity](#) in modern society. Every breath we take is now toxic, [air particulate pollution is taking an immense toll on human health](#). The largest source of this atmospheric pollution, [climate engineering, is systematically denied by the central banker controlled so called "experts"](#) whose paid for opinions societies blindly accept. Those who dare to even mention the truth often face draconian consequences from a societal system that has in so many ways abandoned any sense of reason or morality.

[While criminal leaders seek the expansion of empire, the point of no return for life on Earth has potentially already been passed.](#) The primary objective of the facade global climate conferences is to covertly force countries to accept the ongoing and expanding climate engineering insanity. The long term goal to limit global average temperature rise to 2C (set only last year at the Paris climate conference, 2015), may possibly be officially [exceeded only one year from the date of the conference](#), 2016. [Rapidly worsening global droughts](#) are decimating ecosystems and populations. [In regard to the epic droughts, climate engineering is verifiably the single greatest causal factor \(also fueling forest fires like the catastrophic inferno currently burning in Canada\)](#), yet, again, this fact is completely ignored or blatantly denied by the corporate media, academia, and their paid for “experts”. [To control the water supply](#) is to control populations.

[The deadly heat wave that is occurring in India](#) is only one example. It may become the most deadly ever, and summer is still to come. [Is India being punished by the climate engineers for its recent ousting of Monsanto?](#) Though the runaway planetary warming is all too real (with countless forms of [anthropogenic damage fueling the fire](#)), all available evidence makes clear that the geoengineers can clearly push extreme conditions further in any direction.
