

# Protection from 5G Apocalypse

By Pia and Cullen | [Laarkma](#)

Lately, many people have asked us to supply links for protection against 5G and other EMFs, as more and more satellites are launched and turned on. While devices that offer protection cannot and will not solve the problem of 5G, they certainly can offer our physical and mental bodies a measure of relief until together we manage to stop this assault against life.

Arthur Firstenberg, the author of [The Invisible Rainbow—A History of Electricity and Life](#), has provided an in-depth summary of what we are facing [here](#). We recommend you thoroughly what he has to share in this article, and take it to heart.

Below you will find links to EMF protection devices. Make sure

what you purchase is capable of handling 5G radiation, not just 3G and 4G EMFs.

Personally, we highly recommend Blushield Ultra Premium Portable and Ultra Premium and the Somavedic Medic Green Ultra devices, which have a powerful field effect against incoming 5G. You can check all of these and see which feels right for you. Investing in your health is always a good investment.

With kindness, compassion, and love,

Pia and Cullen
