

Secret Societies and Science – Sixth Excerpt From The Great Pyramid's Blessed Curse

By [Omar Cherif](#)

What I found quite interesting as well is how *Freemasonry* and the occults have always been rooted in Egyptian and Babylonian mysticism, and the glorious Great Pyramid of course. *Free Masons* hold seasonal, semi-secretive gatherings at the pyramid because they believe in its power, while the *Illuminati's* symbol is the singular eye in a pyramid's capstone which symbolizes the enlightened few, i.e. *The Illuminati*. The same eye can be seen on every dollar bill where, the 13-stepped pyramid supposedly represents the incomplete mankind and the "all-knowing" eye in the above detached capstone represents those who reign in power over the world and control its masses through occultism. When 1% of the population owns 40% of our planet's wealth, I have to ask if that's not exactly what's happening in the world today? How did it get to that?

We can also read "*Novus Ordo Seclorum*" on the dollar bill which translates as "**New Order Of The Ages**" and synonymous with The "**New World Order**" *George Bush Sr.* first mentioned publicly in 1990 in his speech before a joint session of Congress, and again on March 6th, 1991 following the expulsion of Iraqi forces from Kuwait. It is well known that The Bush family are active members of the secret society Skull And Bone, and along with The Rockefeller, The Rothschild and several more *Illuminati* bloodlines, they are the ones who dominate over the world today. Which reminds me of the quote: "If my sons did not want wars, there would be none" by *Gutle*

Schnaper, Mayer Amschel Rothschild's wife. And that was before her death in 1849!

Is it yet another coincidence that the pyramid is linked to the secret societies who, in fact, do reign over the world? They control the oil, the wars, the media, all major corporations, the drugs, the global monetary system and the banks. It's actually quite absurd when thinking about how they are the ones who have been deciding the fate of humanity for quite some time. It was thought-provoking to learn from **David Rothkopf**, the U.S author who wrote the controversial book [Superclass](#), that there are only 6,000 people (approximately) or one individual in every million who is a member of this "Superclass" that runs our world.

It is also well known that these societies believe in opening portals between dimensions and practice ancient occultist rituals to reach the *New World Order*, of course with them as its leaders. Could the knowledge they must possess or the 'energy' they must control be related to our missing capstone and the ancient Egyptians whom for thousands of years did also rule over the world?

I personally believe that there must be some forbidden knowledge granting them this substantial power and superiority and making them control the world in such an obviously-unjust way. It also appears that it must have started a long time ago, leaving my desire to know much more increase day by day. To get a clearer understanding, I wanted to know what science has to say.

While doing some research before writing this humble exposé, I came across a German-born British inventor by the name of **Sir William Siemens** (1823-1883) who once climbed to the top of the Great Pyramid when one of his local guides noticed that when raising his hands with outspread fingers, he could hear an

acute ringing noise. Siemens raised his forefinger and felt a distinctive pickling sensation. Then when he tried to take a sip from a bottle of wine he had bought with him, he received an electric shock. Being a scientist, he moistened a newspaper and wrapped it around the wine bottle to convert it into a Leyden jar, or a device that 'stores' static electricity between two electrodes on the inside and outside of a glass jar – an early form of capacitor. When he held it above his head, sparks were emitted from the bottle and one of the guides got frightened and thought Siemens was up to some witchcraft, and attempted to seize his companion. Siemens then pointed the bottle towards the guide which gave him such a shock that it knocked him to the ground, almost rendering him unconscious.

The energy I felt must have been real.

As demonstrated by **Dr. Moustafa Mahmoud** in **the Amazing Pyramid**, studies showed that meat, milk or fruits kept in the King's chamber of the Great Pyramid will not rot, as well as seeds planted inside will grow faster than if they were outside.

Pyramid Power was first discussed by a French occultist, **Antoine Bovis**, in the 1930's and later by a Czechoslovakian radio engineer named **Karel Drbal** who made a small model with the same proportions of the Great Pyramid and proved that with the right alignment to the North, a razor blade placed in the upper third area will keep its sharpness much more than a regular blade. He explained that without any mechanical, thermal, chemical or electrical energy, the pyramid shape draws the electro-magnetic field of the earth which maintains the sharpness of the blade, and stops the food from rotting. It is reported that Drbal shaved with one blade 200 times. He also obtained a patent for the invention even though the whole concept of his breakthrough discovery was openly borrowed from Ancient Egyptians.

A little skeptic, Dr. Mahmoud repeated the experiment himself

with a red apple, and found that instead of the usual 1 week, it remained intact for 3 months, not fresh but still red and definitely not rotten. He also repeated it with milk which was transformed to yoghurt with time and never went bad.

More extensive researches were done by the Architect and Egyptologist **Dr. Sayed Karim**, and later by his son, **Dr. Ibrahim Karim**, who proved that the subtle energy caused by the geometrical figure is what stops the replication of the bacteria since it has preservation properties and hence, the food doesn't rot. He is also the founder of **BioGeometry**, which is the science dealing with the energy of shape that is used for balancing – a sort of Ancient Egyptian Feng Shui, if you will. Both scientists have many publications about this new yet ancient interesting field, with the latest being a book by *Dr. Ibrahim* called **BioGeometry: Back To a Future For Mankind**.

Just like the case with any matters that come from outside our norm and are not fully understood, some conventional scholars still consider pyramidology to be pseudo-scientific speculations based on sensational and inaccurate hypotheses. Maybe not many of them have climbed the Great Pyramid or have tried to “connect” with it first to be so sure.

When facing the skeptics, I like to remember another quote by the genius inventor, physicist and futurist *Nikola Tesla*: **“If you want to find the secrets of the universe, think in terms of energy, frequency and vibration.”** The energy was indeed real, but how did the Ancient Egyptians know about it thousands of years ago makes it all seem unreal.
