

11:11 and Artificial Intelligence – Is there a Connection?

Think you've heard it all when it comes to why people are seeing 11:11 and other repeating numbers? Think again!

For many, it all started with the 11's (i.e. 11:11 on the clock) and now it's burgeoned well beyond the pair of ones to include a whole range of double digits (22, 333, 44 and so on.).

So what's going on?

I recently spoke about my own unrelenting journey with double numbers that was kicked up a notch back in late September when I recently appeared on [Jimmy Church's Fade to Black](#) radio program.

Though I certainly can't say for sure what is going on with numbers appearing more prominently right now to more and more people, I can say for sure that something *big* is going on.

Could that something big include a push to bring humanity into the age of A.I.?

In a paper published by Stanford University in 2007 artificial intelligence is described as: "...the science and engineering of making intelligent machines, especially intelligent computer programs. It is related to the similar task of using computers to understand human intelligence, but AI does not have to confine itself to methods that are biologically observable."

And that's where it can get a little (no, a lot) dicey!

Granted there are many proponents of A.I. espousing the merits of graduating mere mortals to a new level of super human. But equally valid are those concerned with stripping humanity of the "organic" and replacing it with its synthetic counterpart.

Further, some of those very same proponents, many of whom are a part of the mainstream scientific "elite," contend that we may already be living in an artificially intelligent simulation; a cosmic internet of sorts.

One in this camp is NASA's Jet Propulsion Labs scientist Rich Terrell who contends that our creator may just be a 'cosmic computer programmer.'

Terrell was quoted in a [2012 article](#) as saying, "One has to think what are the requirements for God? God is an inter-dimensional being connected with everything in the Universe, a creator that is responsible for the Universe and in some way can change the laws of physics, if he wanted to. I think those are good requirements for what God ought to be."

He went on to explain that this is the same as programmers creating simulations.

Put these two ideas of reality together, one that says we need to be living in a more A.I. focused reality and the other saying, heck, we already are – and where does this all lead?

Conspiracy researcher David Icke was also a recent guest on Church's Fade to Black and during his discourse on the reality of A.I. he weighed in on what he called "The Double Bluff."

"There is of course this agenda of artificial intelligence and connecting people to technology...We've got to watch the double-bluff. Where they say, 'Well yeah we do live in a simulation. Let's just make the best of it.' We have to be aware of that," Icke commented.

So with this brief summary now in our back pocket, what do seeing repeating numbers these days have to do with it all?

Let's look at this *equation*...

If our universe is in actuality a simulation; a cosmic computer cranking out numerical code to create reality, and the veil that's masked our understanding of reality is now disappearing, then we are now seeing what reality is indeed really made of...NUMBERS!

It would not do justice to present this as an overly simplified hypothesis, and yet in looking at this as a syllogism, we may just have gotten a little bit closer to *cracking the code* on why so many people are seeing double numbers more, not the least of which is 11:11!

Let's muse about this in greater detail in this [latest episode of Conscious Commentary!](#)
