

Former Pfizer VP: ‘Your Government is lying to You in a Way That Could Lead to Your Death.’

Dr. Mike Yeadon

By Patrick Delaney | [LifeSiteNews](#)

April 7, 2021 ([LifeSiteNews](#)) – Dr. Michael Yeadon, Pfizer’s former Vice President and Chief Scientist for Allergy & Respiratory who spent 32 years in the industry-leading new medicines research and [retired](#) from the pharmaceutical giant with “the most senior research position” in his field, spoke with LifeSiteNews.

He addressed the “demonstrably false” propaganda from

governments in response to COVID-19, including the “lie” of dangerous variants, the totalitarian potential for “vaccine passports,” and the strong possibility we are dealing with a “conspiracy” which could lead to something far beyond the carnage experienced in the wars and massacres of the 20th century.

His main points included:

1. There is “no possibility” current variants of COVID-19 will escape immunity. It is “just a lie.”
2. Yet, governments around the world are repeating this lie, indicating that we are witnessing not just “convergent opportunism,” but a “conspiracy.” Meanwhile, media outlets and Big Tech platforms are committed to the same propaganda and the censorship of the truth.
3. Pharmaceutical companies have already begun to develop unneeded “top-up” (“booster”) vaccines for the “variants.” The companies are planning to manufacture billions of vials, in addition to the current experimental COVID-19 “[vaccine](#)” campaign.
4. Regulatory agencies like the U.S. Food and Drug Administration and the European Medicines Agency, have announced that since these “top-up” vaccines will be so similar to the prior injections which were approved for emergency use authorization, drug companies will not be required to “perform any clinical safety studies.”
5. Thus, this virtually means that the design and implementation of repeated and coerced mRNA vaccines “go from the computer screen of a pharmaceutical company into the arms of hundreds of millions of people, [injecting] some superfluous genetic sequence for which there is absolutely no need or justification.”
6. Why are they doing this? Since no benign reason is apparent, the use of vaccine passports along with a “banking reset” could issue a totalitarianism unlike the world has ever seen. Recalling the evil of Stalin, Mao,

and Hitler, "mass depopulation" remains a logical outcome.

7. The fact that this at least *could be* true means everyone must "*fight like crazy to make sure that system never forms.*"

Dr. Yeadon began identifying himself as merely a "boring guy" who went "to work for a big drug company ... listening to the main national broadcast and reading the broadsheet newspapers."

Continuing, he said: "But in the last year I have realized that my government and its advisers are lying in the faces of the British people about everything to do with this coronavirus. *Absolutely everything.* It's a fallacy this idea of asymptomatic transmission and that you don't have symptoms, but you are a source of a virus. That lockdowns work, that masks have a protective value obviously for you or someone else and that variants are scary things and we even need to close international borders in case some of these nasty foreign variants gets in.

"Or, by the way, on top of the current list of gene-based vaccines that we have miraculously made, there will be some 'top-up' vaccines to cope with the immune escape variants.

"Everything I have told you, every single one of those things is demonstrably false. But our entire national policy is based on these all being broadly right, but they are all wrong."

'Conspiracy' and not just 'convergent opportunism'

"But what I would like to do is talk about immune escape because I think that's probably going to be the end game for this whole event, which I think is probably a conspiracy. Last year I thought it was what I called 'convergent opportunism,' that is a bunch of different stakeholder groups has managed to pounce on a world in chaos to push us in a particular direction. So it *looked* like it was *kind of* linked, but I was

prepared to say it was just convergence.”

“I [now] think that’s naïve. There is no question in my mind that very significant powerbrokers around the world have either planned to take advantage of the next pandemic or created the pandemic. One of those two things is true because the reason it must be true is that dozens and dozens of governments are all saying the same lies and doing the same inefficacious things that demonstrably cost lives.

“And they are talking the same sort of future script which is, ‘We don’t want you to move around because of these pesky varmints, these “variants”’— which I call ‘samiants’ by the way because they are pretty much the same – but they’re all saying this and they are all saying ‘don’t worry, there will be “top-up” vaccines that will cope with the potential escapees.’ They’re all saying this when it is obviously nonsense.”

Possible end game: vaccine ‘passports’ tied to spending allowances, thorough control

“I think the end game is going to be, ‘everyone receives a vaccine’... Everyone on the planet is going to find themselves persuaded, cajoled, not quite mandated, hemmed-in to take a jab.

“When they do that every single individual on the planet will have a name, or unique digital ID and a health status flag which will be ‘vaccinated,’ or not ... and whoever possesses that, sort of single database, operable centrally, applicable everywhere to control, to provide as it were, a privilege, you can either cross this particular threshold or conduct this particular transaction or not depending on [what] the controllers of that one human population database decide. And I think that’s what this is all about because once you’ve got that, we become playthings and the world can be as the controllers of that database want it.

“For example, you might find that after a banking reset that you can only [spend through using an app](#) that actually feeds off this [database], your ID, your name, [and] your health status flag.”

“And, yes, certainly crossing an international border is the most obvious use for these [vaccine passports](#), as they are called, but I’ve heard talk of them already that they could be necessary for you to get into public spaces, enclosed public spaces. I expect that if they wanted to, you would not be able to leave your house in the future without the appropriate privilege on your app.

“But even if that’s not [the] true [intent of the vaccine campaign], it doesn’t matter, *the fact that it could be true* means everyone [reading] this should *fight like crazy to make sure that [vaccine passport] system never forms.*”

“[With such a system], here is an example of what they could make you do, and I think this is what they’re going to make [people] do.

“You could invent a story that is about a virus and its variations, its mutations over time. You could invent the story and make sure you embed it through the captive media, make sure that no one can counter it by censoring alternative sources, then people are now familiar with this idea that this virus mutates, which it does, and that it produces variants, which is true [as well], which could *escape your immune system*, and *that’s a lie*.

“But, nevertheless, we’re going to tell you it’s true, and then when we tell you that it’s true and we say ‘but we’ve got the cure, here’s a top-up vaccine,’ you’ll get a message, based on this one global, this one ID system: ‘Bing!’ it will come up and say ‘Dr. Yeadon, time for your top-up vaccine. And, by the way,’ it will say ‘your existing immune privileges remain valid for four weeks. But if you don’t get your top-up

vaccine in that time, you will unfortunately detrimentally be an “out person,” and you don’t want that, do you?’ So, that’s how it’ll work, and people will just walk up and they’ll get their top-up vaccine.”

Gov’t lies, Big Pharma moves forward, medicine regulators get out of the way, and possible ‘mass depopulation

“But I will take you through this, Patrick, because I am qualified to comment. I don’t know what [Vanden Bossche](#) is about. There was no possibility *at all*, based on all of the variants that are in the public domain, 4000 or so of them, none of them are going to escape immunity [i.e. become more dangerous].

“Nevertheless, politicians and health advisers (to loads of governments) are [saying that they are](#). They’re lying. Well, why would you do that?

“Here’s the other thing, in parallel, pharmaceutical companies have said, several of them, it will be quite easy for us to adjust our gene-based vaccines, and we can hasten them through development, and we can help you.

“And here’s the real scary part, global medicines regulators like [the U.S. Food and Drug Administration] [FDA](#), the Japanese medicines agency, the [European Medicines Agency](#), have gotten together and announced ... since top-up vaccines will be considered so similar to the ones that we have already approved for emergency use authorization, we are not going to require the drug companies to perform any clinical safety studies.

“So, you’ve got, on the one hand, governments and their advisers that are lying to you that variants are different enough from the current virus that, even if you’re immune from natural exposure or vaccination, you’re a risk and you need to come and get this top-up vaccine. So, I think neither of those

is true. So why is the drug company making the top-up vaccines? And [with] the regulators having got out of the way – and if Yeadon is right, and I'm sure I am or I wouldn't be telling you this – *you go from the computer screen of a pharmaceutical company into the arms of hundreds of millions of people, some superfluous genetic sequence for which there is absolutely no need or justification.*

“And if you wanted to introduce a characteristic which could be harmful and could even be lethal, and you can even tune it to say ‘let's put it in some gene that will cause liver injury over a nine-month period,’ or, cause your kidneys to fail but not until you encounter this kind of organism [that would be quite possible]. *Biotechnology provides you with limitless ways, frankly, to injure or kill billions of people.*

“And since I can't think of a benign explanation for any of the steps: variants, top-up vaccines, no regulatory studies... it's not only that I cannot think of a benign explanation, the steps described, and the scenario described, and the necessary sort of resolution to this false problem is going to allow what I just described: unknown, and unnecessary gene sequences injected into the arms of potentially billions of people for no reason.

“I'm very worried ... that pathway will be used for mass depopulation because I can't think of any benign explanation.”

‘Absurdly impossible’ variants will escape immunity, ‘just a lie’

“If I can show you that one major thing that governments around the world are telling the people is a lie, you should take my 32 years of experienced opinion that says, most of it, if not all of it, is a lie.”

“The most different variant is only 0.3% different from the original sequence as emailed out of Wuhan in ... January 2020. 0.3% [is] the one [variant] that is the *most* different on the

planet so far. And now another way of saying it is, 'all of the variants are not less than 99.7% identical to each other.'

"Now, you might be thinking, 'hmm, .3%, is that enough [to escape immunity and become more dangerous]?' The answer is *no*. Getaway, ya know, get out of here ...

"The human immune system is a thing of wonder. What it does is when it faces a new pathogen like this, you've got [professional cells](#), they're called [professional antigen-presenting cells](#) –they're kind of rough tough things that tend not to succumb to viruses. And their job is to grab foreign things in the near environment and tear them limb from limb [inside the cell]. They really cut them up into hundreds of pieces. And then they present these pieces on the surfaces of their cell to other bits of your immune system, and amazingly, because of the variability that God and nature gave you, huge variability to recognize foreign things, and your body ends up using 15 to 20 different specific motifs that it spots about this virus. They're called [epitopes](#), basically, they're just like little photographs of the details about this virus. That's what they do. And that is what is called your repertoire, your immune repertoire is like 20 different accurate photographs, close-ups, of different bits of this virus.

"Now, if a tiny piece of the virus changes, like the .3% I've just described, if you are reinfected by that variant, your professional cells tear into that virus and cut it into pieces, present them again, and lo and behold, most of the pieces that you have already seen and recognized, are still there in the variants.

"There is absolutely no chance that all of them will fail to be recognized and that is what is required for immune escape, to escape your immunity. It must present to you as a new pathogen. It must be sufficiently different that, when it is cut up by your professional checker cells, it won't find

mostly the same thing it has seen before. *And that is just absurdly impossible when you have only varied .3%, so it is 99.7% (similar).*

“You can go and check that by looking at papers by a person called [Alison Tarke](#). There is also [Shane Crotty](#) and all of the other co-authors.

“And before them, coming from my theoretical understanding of multi-locus immunity, which is what I just badly tried to describe, to what actually happens ... If your [immune system] is presented with something that contains even half of those similar pieces, there is no way your body will say, ‘that’s a new pathogen.’

“*And, so, the idea that 0.3% could even have a chance of getting around immunity is just a lie. It’s not [even] like an opinion difference.*

“I don’t think 3% would be enough. That’s 10 times more variation than has occurred in 16 months [with this virus]. I don’t even think a 30% difference would be enough. So, I’m saying that 100 times more variation than has actually happened, would still leave me putting *a big bet on the human immune system not being fooled that these are new pathogens.*

“I’ve chatted this over with several professors of immunology and they agreed with me, it’s like, ‘why are you asking me this?’

“So, I think that what I’ve just said is that governments and their advisors in multiple countries are lying about variants. That’s a massive thing! You should check it out. Your readers should check it out. If it’s true, don’t you think it’s terrifying?! It was when I realized it.

“So, they’re lying about variants, and then, of course, since [the variants] are not really different, you do not need a ‘top-up’ vaccine. *Now you should be getting the hairs on the*

back of your neck up because they are [making them right now!](#)"

"They are making [billions](#) of vials of it. And they will be available by the end of the year.

"And I think they'll require people to first, be on the vaccine passport one-world database, and then it will roll up into the top-ups, and if it takes a bit longer it will take a bit longer.

"But this is not going away. It won't go away until enough people, if they ever do, say 'you're a bunch of frauds and we are taking our freedoms back, so you can just stop doing this.'

"Because one person shouting into the wilderness and all of the other academics looking the other way, will have us just going down this pipe maybe a week later than if I hadn't said anything, but we're still going down *to hell*.

"So, that's why I'm frightened.

"The variants aren't different. I call them 'samiants'... they're pretty much the same. They're not different. Therefore, you don't need a top-up vaccine, so don't go near any of them."

'Why is my government lying to me?' Because 'they are going to kill you.'

"[And if you recognize that our governments are involved in a major verifiable lie], don't just turn your computer off and go to supper. Stop. Look out the window, and think, 'why is my government lying to me about something so fundamental?' Because, I think the answer is, *they are going to kill you using this method. They're going to kill you and your family.*

"The eugenicists have got hold of the levers of power and this is a really artful way of getting you to line up and receive some unspecified thing that will damage you. I have no idea

what it will actually be, but it won't be a vaccine because you don't need one. And it won't kill you on the end of the needle because you would spot that.

"It could be something that will produce normal pathology, it will be at various times between vaccination and the event, it will be plausibly deniable because there will be something else going on in the world at that time, in the context of which your demise or that of your children will look normal.

"That's what I would do if I wanted to get rid of 90 or 95% of the world's population. And I think that's what they're doing."

"Now I don't know [for certain] that they're going to use that [system] to kill you, but I can't think of a benign reason, and with that power, they certainly could harm you, or control you, so you should object [and strenuously oppose it]."
