

A Glossary of Higher Consciousness

Many teachers exist to lead us in a light filled journey of love and compassion for all. Kryon/Lee Carroll's message has remained consistent for 30 years. I discovered his teachings a few years ago when I picked up one of his early books at the used book library sale. Below is a partial glossary of terms used by Kryon, familiar terms in some circles and maybe some new ones for you.

Kryon says that what we "describe as Human consciousness doesn't really belong to Humans. Rather it is just consciousness. It only belongs to the Human Being because Humans see it that way. Humans generate an energy of consciousness, so it is called Human consciousness".
