

The Science and Psychology of Love

We simply call this mysterious feeling “love” but believe it or not, there is a complexity behind the wheel driving us to cogitate our involvement in this feeling—some sort of devoted and passionate feeling. Science has sought long to detect the basic phenomenon behind amity and has concluded at many stages that love is the most alluring feeling in our life aiding us to thrive. Fidelity compels us to accelerate the process of reproduction. Staying over the rainbow and in love with the world is not a casual nexus.
