

The Six Best Dog Foods for German Shepherds

The German Shepherd Dog, often abbreviated as GSD, is a famous breed, and finding dog food appropriate for this breed is not a challenge either. However, it's essential to understand that German shepherds are considered notorious for food allergies. For this reason alone, we recommend delicacies that are safe based on your dog's age and nutritional requirements. Remember, even though an adult German Shepherd may not experience serious issues with poor diet, puppies are considered at risk of severe health issues such as canine hip dysplasia (caused by excess calcium intake), which can cripple your canine friend and totally degrade his/her quality of life on your watch.

NOTE: German Shepherd puppies are constantly growing and need special nutrition for optimum growth and health. Do not introduce your puppy to adult food until they have attained at least one to two years of age.

The Best Foods for Your German Shepherd Dog

It's prudent to consult with your doctor to determine your dog's health and the type of diet required. When you begin your search, keep in mind that not all foods out there labeled "best for German Shepherds" are really the best. Many contain ingredients that may be problematic and less desirable. Below is a list of the best German Shepherd foods available in the market. Read on to select your preferred food based on your dog's age and nutritional requirements.

1. **Cornucopia Slow Roasted Organic Chicken & Liver – ORGANIC**

A product of [Cornucopia Pet Food](#), this dog food is made of the highest human-grade ingredients and is designed to supply your

German Shepherd with the purest and non-toxic proteins and limited amounts of carbohydrates. With no added sugars, flavors, or preservatives, this dog food is considered one of the safest pet foods on the planet. The Slow Roasted Organic Chicken & Liver from Cornucopia has more Metabolizable Energy per can than most other pet food on the market, thus saving you money as your dog will require less food to achieve nutritional requirements.
